

Power Color International GmbH
**presents the Aircleaning-Technology
of the 21st Century**

**AntiVirus-Coatings for
Means of Transportation**

The Power Color International GmbH Company Group

The **Power Color International GmbH** was founded in 2006 and is a member of the Maxit Franken GmbH & Co, headquartered in Kasendorf / Bavaria. The focus of Power Color International GmbH is on research, product development and distribution of innovative, environmentally conscious high-tech products for coating and grafting of surfaces of all types.

Joined companies:

- **Sanders Group Ltd.**
- **NADICO Technologie GmbH**

NADICO Technologie GmbH is a specialist in research and development of photocatalytic surfaces treatments.

Sanders Group is responsible for the development of mineral binder systems.

AntiVirusSystem

Our **AntiVirusSystem** products combine the useful features of photocatalysis with those of modern nanotechnology. **AntiVirusSystem** is completely nonhazardous for humans and animals.

With **AntiVirusSystem** coated surfaces have useful properties. These are:

-  **Self-cleaning**
-  **Air purification**
-  **Deodorizing**
-  **Sterilizing**
-  **UV-protection**

[**ANTIVIRUS
COATING**]

Coatings for Means of Transportation

We offer in- and outdoor **AntiVirus-Coatings** for lots of different applications for means of Transportation.

- Coatings that deodorize high frequented areas against bad odour
- Coatings as prevention against virus and germs
- Coatings to remove nitrogen oxide and organic particular matter

Coatings for Means of Transportation

Indoor areas:

- Deodorizing in passenger areas and restrooms
- Antimicrobial surfaces in passenger areas and areas with high hygiene requirements
- No cross-boarder transmission of diseases caused by aircrafts/airplanes/planes due to the active prevention of AntiVirusSystem (Coating)

Benefits:

- No unpleasant odor in passenger areas
- Considerable reduction of the cleaning costs
- Photocatalytic air-cleaning causes better air quality

Coatings for Means of Transportation

Outdoor areas:

- self-cleaning outer surfaces of any types
- removal of nitrogen oxide and organic particular matter

Benefits:

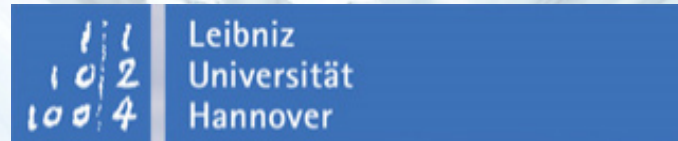

- cost-efficiency caused by extended cleaning-intervals
- photocatalytic air-cleaning causes better air quality which will be free of germs, bacterias and viruses

Coatings for Means of Transportation

Certificate and References:

AntiVirus Products are certified by the Leibniz University, Germany and the Quality-Labs in Germany.
